

- ▶ All types of displays and VMSs
- ▶ Simple text to full-color images
- ▶ WYSIWYG text editor (What You See Is What You Get)
- ▶ Integrated templates, icons and official road sign library

## MobiMaestro-DISPLAY

### Information for all types of traffic

Use MobiMaestro-DISPLAY to display messages and directions for road traffic and vessel traffic on almost any type of display or VMS. This module can control multi-line text displays as well as large full-color displays and small matrix displays. Suitable for instance for temporary displays, or crowd management and parking guidance during events. MobiMaestro-DISPLAY keeps road and vessel traffic in your region informed.

## Characteristics

<b>Objects</b>	VMSs, 1/2/3-line displays, text displays, image displays, sign groups, prismatic variable message signs, dynamic arrows
<b>Protocols</b>	DISPERANTO, RSMP, DVM-Exchange, supplier-specific
<b>Applications</b>	Parking management (PRIS), route guidance, shipping guidance, traffic information, bicycle traffic information, scenario management, public transport information

## Real-time control, fast and flexible

MobiMaestro-DISPLAY gives you real-time control over roadside displays and displays along waterways. For instance for route guidance for regular traffic. What are the travel times on the roads and on waterways, when do bridges and locks open, where can vessels find moorings? With MobiMaestro-DISPLAY in your traffic control center, you can rapidly adjust the information on all your displays.

## MobiMaestro

MobiMaestro is the platform for coordinated network-wide traffic management. Adjust your traffic strategy to policy goals, integrate various traffic instruments, and work within an open architecture in order for everything to be connected. MobiMaestro-DISPLAY works together seamlessly with other modules, but can also be deployed as a stand-alone solution. Just like the other modules, MobiMaestro-DISPLAY can either be installed on your own IT environment or be hosted by us.
